annoying sign up. I used to play this in SEA server, actually got hooked with this game. But the way cherry credits is for the EU server sign up isn't just worth anyone's time.. i love this game, it can be quite difficult to master or even get the hang of at times but it makes it all the more fun when you can win at it :P. normally i wouldnt review but seriously if i need to make a second account cause steam (or their launcher) wont let me log in with facebook..... fail. Dear developers of dragons nest, You messed up when you let [cherry.com become your method to log in. I hate you and personally I prefer Minecraft compared to Dragons nest. fix game pls..... Cannot create account, because of buggy ***, i cannot enter a digit code....](#) [How am i supposed to enter a security code when i cannot even enter 1 digit?](#) [Everytime i click a number it says "Please enter a security code".](#) [Thats what i am trying, stop frikkin reloading.....](#)

absolutely \u2665\u2665\u2665\u2665\u2665\u2665\u2665.

trying to make an account not only is tiring and time consuming, it is also bugged.

whenever i try to set the security pin, every single button on the pin pad does not add a number and resets the page, no info on the forums about this thing whatsoever.

I'd say that a game that requires you to waste so much time on the internet trying to find a solution to a problem even before starting to play is just garbage.. Piece of\u2665\u2665\u2665\u2665\u2665 so many \u2665\u2665\u2665\u2665ing bugs!!!! good game but dont download it from steam if u want to play the game. Awesome game! would love some open world dungeons as wel but pretty awesome game :p One of the best MMO's I played. Personally my fav MMO RPG ever.... Creating account doesn't work, after creating from the cherry website and logging in, game doesn't work.

"A Hero Is Born. You are now ready for battle!" - I wanted to be ready the very first time I launch or created an account.... The Hero is born and is now dead.

I did play DN before it was released on Steam, worked fine before but now I give up all hope on trying to play this game again...
